Updates bring you to the highest levels of performance and security available for Office XP. Microsoft recommends that you use the Office Update tool on this site to install updates.

7) Question of the Month about Software Training:

Each month Scott Turton will answer a current or important question that we have received about computer and software training.

August 2005 Question:

How do you find all of the free computer training for software, Microsoft Office, and web

development on the web?

Answer:

Here is another type of google search you can do to find the free computer training, tutorials and books that you are looking for.

Type in your keywords, followed by "(books OR tutorial) (pdf OR zip OR chm OR rar) -purchase -buy -shopping -review" without the double quotes. So, for example, doing a search for Excel, you would enter the following into google's search box (without the double quotes): "excel (tutorial OR books) (pdf OR zip OR chm OR rar) -purchase -buy -shopping -review"

Here are the links to 4 google searches using this method:

Microsoft Excel:

<http://www.google.com/..excel..Search>

Macromedia Flash:

<http://www.google.com/..flash..Search>

Adobe Photoshop:

<http://www.google.com/..photoshop..Search>

Web Development:

<http://www.google.com/..web+development..Search>

You can change the search terms somewhat, using only 'books' or 'tutorial', for example, or adding more or less keywords in the beginning of the search phrase.

You will still need to dig a little into the results of these searches, but you should find what you're looking for. I recommend reviewing at least 100, and preferable 200 search results from these searches to find the best free training content and materials.

I hope this helps you.
