[7\)... Question of the Month about Software Training](#)

[8\)... Please Support Our Computer Training Mission](#)

1) Editor's Greeting:

Hello everyone, and welcome to our new subscribers!

Here is our June 2007 issue (#38) of our Free monthly Newsletter for EducationOnlineForComputers.com, giving you the most current Free online Microsoft Office and Web Development Software Training and Tutorial Resources that we have recently discovered and researched. This newsletter is free to anyone subscribing ([instructions](#) at bottom, no username/password is needed). To access our member site, however, you do need a user name and password - registering as a member of EducationOnlineForComputers.com costs only \$14 for two months, for more information please see [Become a Member of EducationOnlineForComputers.com](#).

My desire is that these free resources will help you with your computer education and training and will help you advance your career. Our main mission is the training of those less fortunate who are seeking to become computer literate, from a user's perspective.

By means of this email newsletter, you have knowledge of and access to these sites before our web site visitors do. The best of these resources will be added to our Member Training pages and the remainder to our Free Training pages.

***** Current Issue *****

In this issue we are featuring a total of 68 Computer Software Application training, learning and tutorial web sites, with a total of 276 tutorial courses linked. It features many Free Microsoft Office, Flash, Photoshop, Dreamweaver, and Web Development training tutorials for your learning profit and enjoyment.

Please take a look at and bookmark our [Blogs](#), these will be updated daily and weekly with [New Free Training and Tutorial Resources](#), as I discover and evaluate them:

Please visit our **New Free Training and Tutorial Search Engine**, [Edcomp.com](#) -

We have deployed a new website at www.edcomp.com that is a search engine with a large database of over 150,000 free IT education and training web resources, with another 70,000 free resources reserved exclusively for paid members. If you're an educationonlineforcomputers.com member, go to <http://www.edcomp.com/members/> to access the special members' page for searching 220,000 free training web resources.

For your convenience, this newsletter is also available to subscribers in HTML format at this special url:

http://www.educationonlineforcomputers.com/current_news.html

If you are looking for free technical or programming training, please visit our sister site:

<http://www.intelligentedu.com>.

Also, please check out our new free computer training search site at www.edcomp.com.

I wish you the best with your computer studies and learning.

Warm Regards,

Scott Turton Newsletter and Web Site Editor

2) The Best New Free Microsoft Office Training & Tutorial Sites:

This section of our newsletter contains the best new Free Microsoft Office training and tutorial sites that we have found and researched in the last few weeks.

[TrainingByEmail](#)

Visit [TrainingByEmail](#) to receive **Free Training for Word, Excel, Outlook, C#, ASP.Net, and SQL** via your email every week! We will send out a new training in the topic of your choosing every week. You can then save this, print it out, or delete it all at your convenience. And you can't beat the price, FREE!

[47 Word Tutorials by Word MVPs](#)

Here are [47 Word Tutorials](#) hosted by the Word MVP Site. This website provides some of the best of the collected knowledge on Microsoft Word. Many of these Word tutorials and tips have been supplied by Microsoft Word MVPs. The Word tutorials cover many features and are for everyone, both those who are beginning and also those who are advanced with their usage of Word. They are applicable to Word 2000, Word XP (2002), Word 2003 and Word 2004.

How to Use Word

- [Bend Word to Your Will](#)
- [How to save yourself hours by using Outline View properly](#)
- [What do all those funny marks, like the dots between the words in my document, and the square bullets in the left margin, mean?](#)
- [Typographical Tips from Microsoft Publisher](#)
- [Some of the most useful Word keyboard shortcuts](#)
- [Word commands, and their descriptions, default shortcuts and menu assignments](#)
- [How can I insert special characters, such as dingbats and accented letters, in my document?](#)
- [Setting tabs](#)

- [Ruler of all you survey: How to make the best use of Word's rulers](#)
- [The strait and narrow – using columns](#)
- [Working with sections](#)
- [How can I automatically generate an index in Word?](#)
- [How to control the page numbering in a Word document](#)
- [Finding and replacing non-printing characters \(such as paragraph marks\), other special characters, and text formatting](#)
- [Finding and replacing characters using wildcards](#)
- [Is there life after “Reveal Codes”?](#)
- [How Word differs from WordPerfect](#)
- [The draw layer: a metaphysical space \(and how to bring it back down to earth\)](#)
- [Cleaning up text pasted from the Web](#)

Merging External Data

- [How to create a Mail Merge](#)
- [Creating a Mail Merge Data Source](#)
- [Making your mail merge “intelligent” by using IF fields](#)
- [Turning Word into a pseudo-database by using Mail Merge Query Options](#)
- [Using MacroButton fields](#)

The Basics with Using Templates

- [Part I: Creating simple templates](#)
- [Part II: Creating complex book and report templates](#)

Troubleshooting

- [How can I recover a corrupt document or template – and why did it become corrupt?](#)
- [How to recover a Master Document](#)
- [Why Master Documents corrupt](#)

Using Tables

- [I have a “Name” column which I want to split into “FirstName”, “LastName” – how can I do it?](#)

Forms, Fields and Macro Programming

- [How to add pop-up lists to any Word document, so you can click your way through changes in seconds](#)
- [Creating a macro with no programming experience using the recorder](#)
- [Run a macro automatically when Word starts or quits](#)
- [Run a macro automatically when a document is created, opened or closed](#)

- [Getting to grips with VBA basics in 15 minutes](#)
- [The art of defensive programming](#)
- [Why variables should be declared properly](#)
- [How to cut out repetition and write much less code, by using subroutines and functions that take arguments](#)
- [When to use parentheses to enclose subroutine and function arguments](#)
- [Early vs. Late Binding](#)
- [Getting help with calling Word's built-in dialogs using VBA \(and why doing so can be much more useful than you'd think\)](#)
- [How to create a Userform](#)
- [Useful WordBasic commands that have no VBA equivalent](#)
- [Working with bookmarks](#)
- [Determine the index number of the current paragraph](#)
- [How to customise the Control Toolbox in the VBA Editor](#)
- [Intercepting events like Save and Print](#)
- [Writing application event procedures](#)

Finding more Help with Word:

- [Tips on posting to the Word newsgroups](#)
 - [Which newsgroup should you post to?](#)
 - [Newsgroup Jargon](#)
-

[FAQs and Tips for Word Drawing and Graphics](#)

Here are 23 Word FAQs, Tips, and Techniques that will help you master and become more productive using [Word's Drawing and Graphics](#) features and functionality. These are written by Microsoft Word MVPs and cover all versions of Word from 2000 to 2004.

General Concepts

- [Inline versus floating graphics](#)
- [Inline–Floating hybrid graphics](#)
- [The drawing layer explained](#)
- [Wrapping](#)

Manipulating Graphics and Drawing Objects

- [Wrapping text around a graphic](#)
- [Working with anchors](#)
- [Unlinking a floating linked graphic](#)
- [Unlinking an inline linked graphic](#)
- [Selecting drawing objects behind text](#)
- [Rotating clipart](#)
- [Rotating or flipping text](#)
- [Set paste inline as the default](#)

Graphics Formats

- [Choosing graphics formats](#)
- [Creating PDF output](#)
- [File associations: restoring](#)

“Graphic Gotchas ”

- [Graphics display as red X's](#)
- [Captions don't update or don't appear](#)
- [Graphics don't display or don't print](#)
- [Preventing graphics reverting to their original size](#)
- [Positioning floating graphics relative to page](#)
- [Floating objects in tables are vertically aligned wrongly](#)
- [Linked floating graphics don't show up in Edit Links](#)
- [Preventing layout change on different computer](#)

[9 Excel Training Tutorials](#)

Here are [9 Free Excel Training Tutorials](#) from NC State Univeristy that will help you **Visualize and Present Data in Excel**. The first two tutorials show you the basics of getting the data into the cells and then creating graphs from the data. The remaining Excel tutorials demonstrate and teach **Advanced Excel Techniques** for formatting, displaying and graphing your data in Excel.

[Data Input Into Excel Cells](#)

Teaches you how to enter your data into Excel's cells, select and specify cell ranges, create formulas to manipulate your data, and format data values for display.

[Creating a Scatter Plot and Line Graph in Excel](#)

Shows you how to create a scatterplot and a simple line graph from your data

[Excel Bar Graphs and Histograms](#)

How to create both single and multiple bar graphs. Learn how and what a histogram is used for. Also find out how to use the Frequency function so you can transform set of data into into a histogram.

[Importing Text Files into Excel](#)

This tutorial describes and shows you how to import data into Excel from a text file written by another program.

[Final Formatting in Excel](#)

Learn how to format Excel graphing components: hide or display them, modify their size, color, and orientation. How to add new components, such as reference lines, using Excel's drawing tools.

[Plotting Regression Lines Using Excel](#)

This Excel tutorial shows you how to create a regression trend line and how to calculate and display the equation for the regression line and its correlation coefficient, R-squared.

[Superimposing Graphs in Excel](#)

Teaches you how to merge data from two graphs, creating one graph. This is usually done so you can show a second independent variable. Also learn how to reformat an Excel graph to correctly present the new variable.

[Creating Error Bars in Excel](#)

This tutorial shows you how to summarize data in Excel using averages and how to display statistical results using error bars.

[Selecting Data in Excel for Display](#)

Explains and describes how to only present a part of your data set in Excel. Also learn how to use graphs to discover and delete outlier data.

Here are [50 Essential Excel Tips](#), from scribd.com, providing step-by-step instructions on how to do many things using Excel. This Excel tips document is available in both .pdf and .doc formats and is 20 pages in length. These shortcuts and techniques will teach you how to use many of Excel's features and how to be more productive with this spreadsheet application. Also, here is another Excel Tips document from Techrepublic offering [75 Excel Tips](#) (free registration required for this one).

Table of Contents of 50 Excel Tips:

- Customizing your workspace
- Change default worksheet options
- Opening multiple windows
- Creating a workspace in Excel
- Change the default currency
- Faster access to worksheets
- Keep a cleaner desktop when multitasking
- Opening a workbook at startup
- Saving time with Custom Views
- Using shared workbooks
- Clear out all comments
- Take a few shortcuts
- Delete personal information from a worksheet
- Editing, layout, and printing
- Hiding duplicate records
- Copying styles between workbooks
- Printing formulas
- Quickly setting a print area
- Print worksheet column labels on every page
- Modify Excel print margins with the mouse
- Don't use AutoFormat on an entire worksheet
- Keep track of changes
- Highlight urgent items
- Using Goal Seek
- Change automatic page breaks
- Entering and working with data
- Use calculated fields in data entry forms
- Speed up data entry with these keyboard shortcuts
- Creating custom lists
- Create a list box to ensure data entry accuracy
- Increase data entry accuracy with drop-down lists
- Create a custom Auto Fill list
- Catching data entry errors
- Format cells as you type

- Analyzing external data in Excel
 - Copy subtotals
 - Summarize data with grouping
 - Simplify data entry with Excel's built-in form
 - Conditional formatting
 - Lock cells to prevent overwriting
 - Point to value thresholds in a cell
 - Ensure proper data entry with validation
 - Check for numbers stored in a text format
 - Formulas, functions, and code
 - Use natural language formulas
 - Counting the days via cell subtraction
 - Compare values in text fields using DCOUNTA
 - Perform calculations with Paste Special
 - Use auditing to troubleshoot
 - Customizing "division by 0" error messages
 - Hide formula cells
 - Web tricks
 - Easy data-posting to the Web
 - Open Web pages right in Excel
 - Hyperlink to a specific cell
-

[3 Illustrated PowerPoint Tutorials](#)

Here are three illustrated PowerPoint Tutorials that will show and teach you how to do and use several important features of PowerPoint.

[PowerPoint Tutorial from Oregon State University](#)

- [Creating Presentation and Teaching Materials using PowerPoint](#)
- [PowerPoint Introduction/Startup](#)
- [Buttons](#)
- [Drawing Toolbar](#)
- [Slide Control Buttons](#)
- [Apply Design](#)
- [Page Setup](#)

- [Templates](#)
- [Background Control and Color Schemes](#)
- [Transitions and Animations](#)
- [Inserting Clip Art, Pictures and Other Media](#)
- [Printing Slides](#)

[PowerPoint Tutorial #1 by Vicki Blackwell](#)

This beginning PowerPoint tutorial shows you how to copy an image file off the web, then how to add transitions, and insert the image file and animate it.

[PowerPoint Tutorial #2 by Vicki Blackwell](#)

This PowerPoint tutorial demonstrates and teaches the following features:

- Custom Animation
- Format Picture for Background
- Adding Sound Files
- Recording Sound Files
- Adding Music from CDs
- Internal Hyperlinks
- Linking Text, Objects, or ClipArt
- Hyperlink to Other Documents
- Hyperlink to Web Addresses
- Selecting Small Objects

[4 Microsoft Access Tutorials](#)

Here are [4 Microsoft Access Tutorials](#) from the University of British Columbia. These Access tutorials will show you how to create Access filters and queries, use an example to demonstrate the relationships among tables in an Access database, use screen shots to demonstrate how to calculate a field, and lastly, a white paper giving you an overview of what databases are along with its terms.

- [Creating Access Filters and Queries](#)

This Access tutorial teaches: What is a Filter, How to Create a Filter, What is a Query, and How to Create a Query.

- [Relationships Between Tables](#)

This Access tutorial teaches, by example, what tables are needed for a database and how to relate one table to another.

- [Calculating Fields in Access](#)

This tutorial shows how to calculate fields in Access, which is done in the Expression Builder.

- [Microsoft Access Whitepaper](#)

Though a little dated, this paper does a good job of discussing the most important concepts of the PC databases. It starts with a working definition of a database, moves on to a short history of database management systems, reviews important database concepts, reviews database design concepts, and ends with a glossary of database terminology. (pdf)

[20 Free Visio 2003 Diagrams](#)

Here is a free download from Microsoft for [20 Free Visio 2003 Diagrams](#) that will help you use this diagramming program more effectively. These Visio diagrams can be used in several areas. Here are some of the available diagrams: Flowcharting, Floor Plans, Computer Networks, Database, Calendar, Electrical Engineering, Organization Chart, Timelines, UML, and Web Design.

- Active Directory diagram – ActvDir.vsd
- Basic Flowchart – Bflowcht.vsd
- Block Diagram - BlkDiagm.vsd
- Building Floor Plan – BldgPlan.vsd
- Basic Network diagram – Bnetwork.vsd
- Brainstorming/Mind map – Brainstm.vsd
- Calendar – Calendar.vsd
- Database diagram – Database.vsd
- Detailed Network diagram – Dnetwork.vsd
- Electrical Engineering Control diagram – EECtrl.vsd
- Fluid Power diagram – FluidPwr.vsd
- Meeting Room layout – MeetRoom.vsd
- Organization Chart – OrgChart.vsd
- Process Engineering diagram – ProcEng.vsd

- IT Rack diagram – Rack.vsd
 - Timeline diagram – Timeline.vsd
 - UML diagram – UML.vsd
 - Web Design diagram – WebDsgn.vsd
 - Web Site diagram – WebSite.vsd
 - Window UI diagram – WinUI.vsd
-
-

3) The Best New Free Training Sites for Flash, Photoshop, Dreamweaver, FrontPage, and other Adobe and Macromedia Applications

[2 Beginning Flash Tutorials](#)

Macromedia Flash is an application you can use to create 2 dimension (2D) animations and multimedia presentations, mainly for websites and web applications. Flash has tools that you use to draw basic objects which are then used to make scenes, and these, in turn, can be used to make a movie.

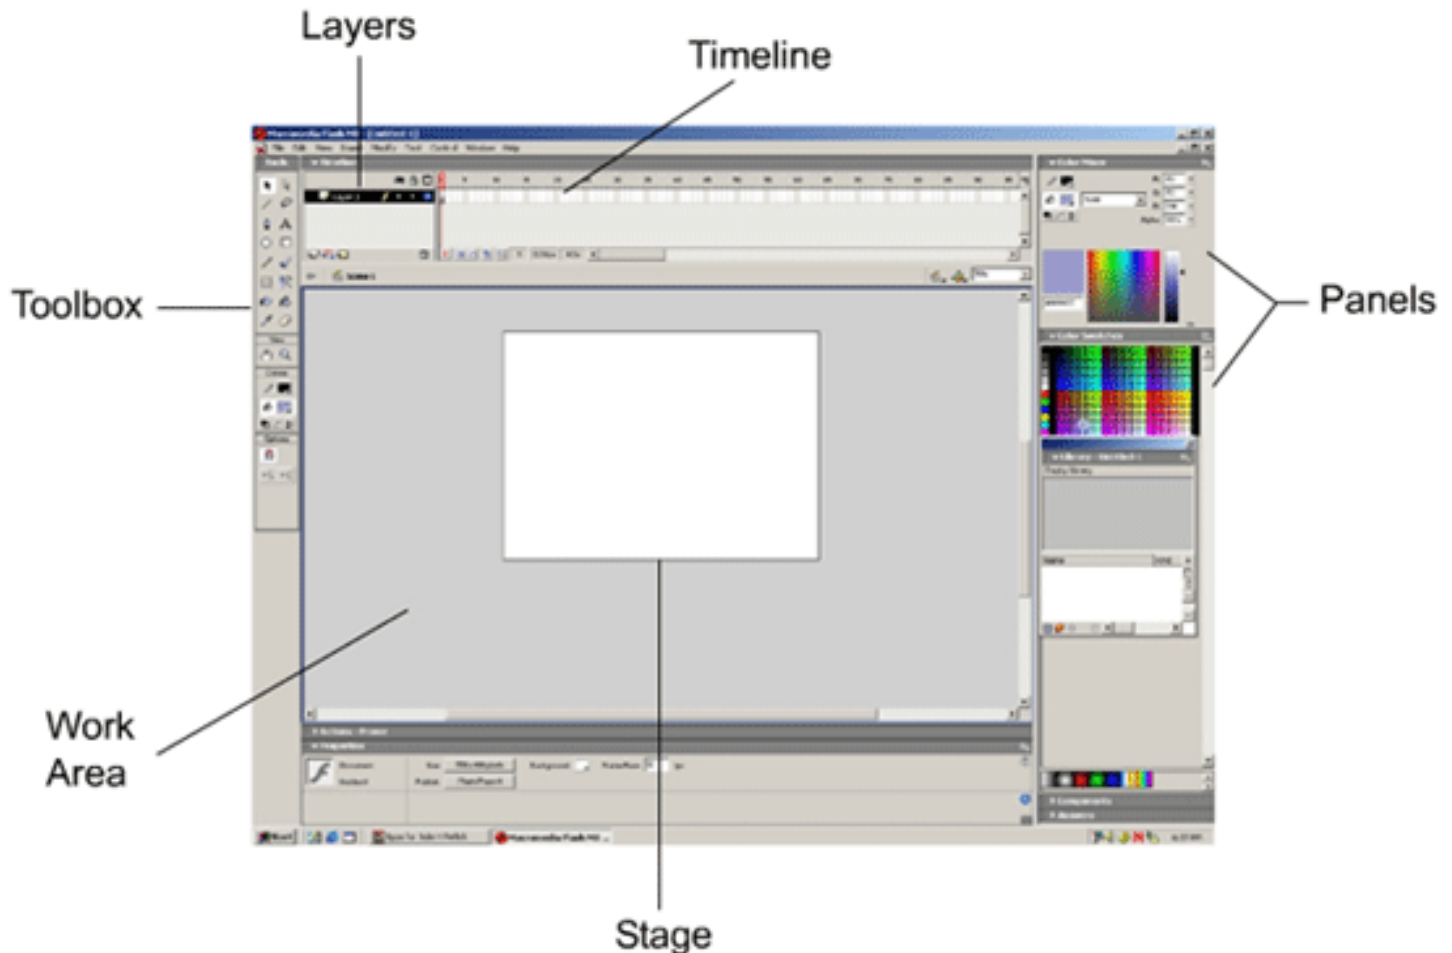

Here are **two Flash Tutorials** to get you started using Flash to create animations and presentations: **[Introduction to Macromedia Flash MX 2004](#)** and **[Introduction to Macromedia Flash MX.](#)**

These Flash tutorials show you how to do the following tasks in Flash:

- * **Drawing Artwork**
- * **Using Keyframes**
- * **Animating an object using motion tweening**

The image below depicts aspects of the Flash environment that you will need to become familiar with.

The Flash Environment

Stage - This is where the animation occurs and what the user sees. You create objects and then animate them so that they enter, exit or remain on the stage.

Work area - This is the behind the scenes area, where you can create objects and get them ready to present and animate on the stage.

Toolbox - The toolbox provides you with the tools with which you can draw and update objects and change text.

Layers - Layers operate like transparencies, permitting you to have many objects doing things simultaneously. You see objects on different layers only when they do not take up the same space.

Timeline - This is how you control the order of events and the timing of events in your Flash animation. The timeline is made up of frames and one frame shows the objects on the stage at that one point in time.

Panels - the panels are used to update the elements of your movie. For example, you can change the color or transparency of an object.

[Beginning Flash and ActionScript Tutorials](#)

ActionScript.org offers many [Flash Tutorials](#) for all skill levels. Here are their [Beginning Flash and ActionScript Tutorials](#) teaching a wide variety of Flash features and functionality for those just starting to learn how to use this important web multi-media, graphics, and animation development application. Here is a sampling of these Flash tutorials:

- [Variables 101](#)
- [Instance Names](#)
- [Paths to Objects and Variables](#)
- [Get Property](#)
- [Set Property](#)
- [Continuously Looping Background](#)
- [Pop Up window within flash](#)
- [Drop down menu](#)
- [Time with Flash 5](#)
- [Drag 'n Drop and Drop Targets](#)
- [Execute Files from Local Presentations](#)
- [Open Documents from Local Presentations](#)
- [Initializing Movie](#)
- [Controlling Different Timelines](#)
- [Using duplicateMovieClip](#)
- [Using attachMovie](#)
- [Converting Basic HTML Forms to Flash](#)
- [Basic Animation Via ActionScript](#)
- [LoadVariables and LoadVars Objects](#)
- [Flash Projectors and Crossplatform \(Hybrid\) CD burning](#)
- [Building games in flash](#)
- [CSS in Flash MX 2004](#)
- [Creating a continuously scrolling newsreel](#)

- [Movement and simple hittest](#)
 - [Common Errors and Debugging](#)
 - [3D Input Text effect](#)
 - [Password protection 2](#)
 - [Creating a basic animation](#)
 - [Doubleclick Event for MovieClip](#)
 - [Write to File: Flash to Server Side interaction](#)
 - [Embedding Flash Objects/Swfs into Powerpoint](#)
 - [Getting started with Actionscript 3](#)
-

Intermediate Flash Tutorials

Here are ActionScript.org's [Intermediate Flash Tutorials](#). These explain and describe many important Flash features and functionality that you will want to learn and use on your web site, if you are a Flash developer. Here is a sampling of these Flash tutorials:

- [Dynamic Layout Control](#)
- [MovieClipLoaders Part 1](#)
- [Set movie clip properties with actionscript](#)
- [The power of nested loops](#)
- [Drag and Drop Disk Menu System](#)
- [Easing Menu System](#)
- [Dynamic menu with submenus](#)
- [Creating a Dynamic Drawing application in Flash](#)
- [Context Menus in Flash MX 2004](#)
- [Using Dynamic Content In MX](#)
- [Pseudo HTML Framesets in Flash MX](#)
- [Sliding Value Setter](#)
- [Preloaders in Flash 5](#)
- [Arrays in ActionScript](#)
- [Motion using Actionscript](#)
- [Video to Vector Animation](#)
- [Full Screen Popup Windows](#)
- [Invoking Actions From HTML Textfields](#)

- [Scripted Loops](#)
 - [The Flash MX Event Model](#)
 - [Dynamically Attaching Components](#)
 - ['Cool and Practical' Sound Effects](#)
 - [Shape Hints and Motion Paths](#)
 - [Easy Movieclip Scrolling in Flash 8](#)
 - [Detecting Key Combinations](#)
 - [Flash MX Object Oriented Menu using PHP](#)
 - [Flash Remoting Best Practices](#)
 - [Dynamic Spinning Text Effect](#)
 - [TweenEffects Class](#)
 - [Exceptions and Exception Handling](#)
 - [Camera-motion controlled ball](#)
-

Advanced Flash Tutorials

These are the [Advanced Flash Tutorials](#) from ActionScript.org that demonstrate many advanced techniques and features of Flash, including the following: Slider Menu, Dynamic text, 3D Face, Games, Sound Timing, Color fade, Dynamic masking, curves and control point placement, Collision Detection, and many more. Here is a sampling of these Flash tutorials:

- [Active Search List](#)
- [Advanced Double Click](#)
- [Advanced Slider Menu](#)
- [Detecting the Mouse Angle](#)
- [Dynamic text with scrollbar](#)
- [Virtual Reality Tours in Flash](#)
- [Text Layout Manipulation](#)
- [Mouse Angle Detection II](#)
- [3D Face Extrusion](#)
- [Class and object in games](#)
- [Creating Flash MX Custom Component Help](#)
- [Advanced Flash MX Sound Timing](#)
- [Reusable ActionScripted Visual Effects \("Multiple effect functions"\)](#)

- [Learn how to access and run php procedural functions from within Flash MX](#)
 - [Color fade](#)
 - [Moving towards the mouse](#)
 - [Flash MX Audio Player](#)
 - [Dynamic masking using the drawing API](#)
 - [Flash MX 2004 Undocumented Tween/Easing Classes Documented](#)
 - [Understanding curves and control point placement](#)
 - [Typography in Flash](#)
 - [Controlling Multi-channel Sound using ActionScript](#)
 - [Using EventDispatcher](#)
 - [Button Animation with RollOver State that Stays when User Clicks a Button](#)
 - [Launch Applications using Flash](#)
 - [Password protected pages](#)
 - [Animating Text By Using ActionScript](#)
 - [Opening Files from their Default Applications](#)
 - [Creating the Time with Flash 5](#)
 - [Circle Collisions](#)
-

[Photoshop Elements 5.0 Tutorials](#)

This new application and programming tutorial web site, Inpics.net, provides the following free [Photoshop Elements 5.0 Tutorials](#). These tutorials will teach you how to use many of the important features of Photoshop Elements. The tutorials on this site are picture-based on screen shots that show you how to perform the tasks being taught. This picture type of tutorial has been shown to be easier for people to use and understand when learning new software and computer techniques.

Photoshop Elements Basics

- [Create GIFs](#)
- [Create JPGs](#)
- [Resize graphics](#)
- [Flip and rotate graphics](#)

Formatting Graphics

- [Crop graphics](#)
- [Reduce file size](#)
- [Change resolution](#)
- [Lighten and darken graphics](#)

Creating Graphics

- [Draw and paint](#)
- [Create text graphics](#)
- [Replace colors](#)
- [Create shapes](#)

Enhancing Graphics

- [Make GIF backgrounds transparent](#)
- [Enhance and correct graphics](#)
- [Work with layers](#)

[100 Photoshop Tutorials from Photoshopsupport.com](#)

Photoshopsupport.com is one of the [best free Photoshop Training and Tutorial sites](#) on the web today. They host and offer these 100 Photoshop tutorials and also provide links to tutorials on other sites. This is our first blog post of their Photoshop tutorials. These teach and show you how to do many of the features that Photoshop offers. They also give you tips and techniques for using Photoshop's expansive functionality. Here are some of these Photoshop tutorials:

- [Working With Photoshop Scripts](#)
- [I See iPod People — The Photoshop Silhouette](#)
- [Photoshop Web Template — Web Site Design Tutorial](#)
- [Blog Templates — Blog Design Tips And Resources](#)
- [Photoshop Keyboard Shortcuts](#)

FrontPage Database Tutorials

These are well written FrontPage Database tutorials that will show you how to use a database with FrontPage, and also how to use the Database Results Wizard (DRW). You will learn how to perform Frontpage functionality such as:

- Sending form information to a database
- Querying the database with a form
- Querying the database with a hyperlink
- Using hyperlink parameters

Here are the FrontPage Database Tutorials offered:

- [The Spooky diet](#)
How to make your code more like asp
- [Unique Auto number](#)
Get the last ID number from the new record just submitted!
- [Adding headers to grouped records](#)
Clean up your table display with a header for each data type
- [Things You Need to Know first!](#)
- [Database Region Wizard Steps](#)
- [Sending form information to a database](#)
- [Updating Records](#)
- [Querying the database with a form](#)
- [Querying the database with a hyperlink](#)
- [Using hyperlink parameters](#)
- [Advanced Tips](#)
- [FrontPage Database FAQ](#)
- [Spooky Login](#)
- [FrontPage 2002 / 2003 Database Tutorial](#)

4) The Best New Free Web Development Training Sites

[Web Page Layout and Design Tutorial](#)

This is a [Web Page Layout and Design Tutorial](#), provided by the Interactive Media Center of the University at Albany. The goal of this tutorial is to provide an overview of the most important web components and concepts that you will need to understand and know when building a Web page.

The pages of this web layout and design tutorial are divided into right and left halves. The left half provides the main content. The right half features interactive elements, additional information, or examples. As you go through the tutorial, follow the instructions, click the buttons, and try the quizzes to see how much you have learned.

[Web Layout and Design Tutorial Table of Contents:](#)

- [How this Tutorial Works](#)
- [Defining a Web Site](#)
- [Identifying the Purpose of a Web Site](#)
- [Identifying Who will Visit the Site](#)
- [Serving the Needs of the Client](#)
- [Basic Web Design Concepts](#)
- [Proximity](#)
- [Alignment](#)
- [Repetition](#)
- [Contrast](#)
- [Navigation](#)
- [Navigation Styles](#)

 - [Tips, Tricks, and Questions](#)
-

[Web Tutorials and Techniques](#)

Here is a post from my blog at Intelligentedu.com for Web Programming Training Tutorials and Techniques, along with sample code. These tutorials are for an introductory Web Page Design Course at Saint Vincent College. The modules and tutorials here cover HTML and web programming techniques. One section teaches Cascading Style Sheets (CSS) and these can make web page and site development much easier and consistent. Other training modules explain techniques that can be used to make web pages more interactive, including coding examples using JavaScript, HTML forms, CGI Scripts, VBScripts, Active Server Pages, and Java Applets.

[Web Programming and Development Books](#)

Here is a repository of online Web Programming and Development Books hosted by [Bulgaria Online Books Archive](#). While these books are dated, many are still a useful as references and for learning how to program web pages and web sites.

Topics Covered:

- HTML
- WEB Publishing with HTML
- Web Scripting
- WebMaster
- Shockwave Web Pages
- Web Graphics and Web Page Design
- Java Web Applets

- Perl for Web Programming
 - WWW Plug-Ins
 - 3D Graphics & VRML 2.0
 - Web Programming
 - Web Publishing
-

[PHP Programming Tutorials](#)

This is a blog post I wrote covering these free [PHP Programming Tutorials](#) at Inpics.net. These will assist you in understanding how to program web pages and web applications using PHP. These PHP tutorials use screen shots and coding examples to teach you how to program important PHP functions and routines. Topics taught include the following: PHP Basics, PHP Variables, Working with Numbers, PHP User Functions, PHP Logic & Loops, and Working with Files..

[Perl Programming Tutorials](#)

Here is another blog post I wrote at Intelligentedu.com for [Perl Programming Tutorials](#) at Inpics.net. These tutorials demonstrate through screen shots and examples how to code important functions and programming topics using Perl. The topics covered by these Perl tutorials are: Perl Basics, Perl Variables, Working with Numbers, Perl Subroutines, Perl Logic & Loops, and Working with Files.

5) The Best New Free Windows, Linux, Hardware and

General Computer Training Sites

[Windows XP: How to Use](#)

These Windows XP Tutorials are provided by Microsoft to help you learn how to use many of the features of this operating system.

[Digital photography](#)

Into digital photography? The features in Windows XP make it easy to transfer pictures directly from your digital camera to your computer and even organize and share your photos.

[Games for Windows](#)

Games for Windows open a wide world of fantasy and adventure. Take a break from reality and have fun with friends and family at any age.

[Making movies](#)

With Windows Movie Maker, you can use your computer to create and edit home movies with a few simple drag-and-drop moves. Then you can share your movies through the web, e-mail, your computer, or CD.

[Music and video](#)

With its fast and flexible playback features, Windows Media Player makes it easy to enjoy your favorite music and movies whenever you like.

[TV and multimedia](#)

Take advantage of these resources to get the most out of your Media Center personal computer.

[Instant messaging](#)

Windows Messenger lets you instantly communicate with friends and family all around the world from your computer, using text chat and even voice and video.

[Security and privacy](#)

Learn to keep your computer and personal data more secure with Windows XP.

[Computer setup and maintenance](#)

Learn how to set up, personalize, and maintain your computer running Windows XP.

[Home and small office networking](#)

Networks let you share files, printers, and other peripherals. Get the information you

need to set up and maintain your own network.

[Pen and ink](#)

Find out how to put the features of Windows XP Tablet PC Edition to work for you.

[Working remotely](#)

Get as much work done on the road as you can in the office. Find out how to use the mobility features of Windows XP Professional.

[Accessibility](#)

Accessibility features in Windows XP make it easier for people with accessibility needs to work efficiently.

[Internet tips](#)

Find time-saving tips for browsing the web using Windows XP.

6) Software, Office and Computer Sites and Downloads Worth Mentioning

The following programs are totally Free, no popups, adware, spyware, or shareware.

ZipSnake

Zip Snake allows you to search anywhere on within Zip files, in a given folder, subfolders, or the whole drive. This tool return files within those Zip files that match your search criteria. You can search for a particular file name or match wildcard criteria such "*.exe", for example. A nice feature of this program is it allows you to right click on your found file and extract it to any target folder.

[Download](#) (2757 kB)

FastOpen

Using FastOpen's right-click menu from the system tray, you can launch your favorite programs, documents, Websites, and single-pane Explorer views of your frequently used folders. You can organize your menu items in any sequence and add separators for logical groupings. Other features are: add all drives to a menu or submenu; insert Run, Find, Open, Connect, and/or Disconnect commands; and automatically place a separator after a certain number of items. FastOpen is easy to use, and you can use it as an alternative to the Windows Start Menu.

[Download](#) (962 kB)

Sleuth-hound

The Sleuth-hound is a full features hard disk search utility. This tool will find all the documents that contain the keywords you enter and lists them in an easy-to-use Results Browser. Then select the documents you need, click on the header or name of the document, and edit or view it in its associated application.

[Download](#) (1165 kB)

SpaceMonger

SpaceMonger keeps track of the free space on your hard drives. It displays, in a relative size format, of all your folders and sub-folders on a given drive. So, for

example, if the "My Documents" box takes up 30% of the screen, then the files in this folders and all its sub-folders are using 50% of the hard drive specified.

[Download](#) (103 kB)

Some other features include the following:

- Supports popup info-tips that can display the full filename, the icon, the date, size, and attributes of any file or folder.
 - Supports popup name-tips that prevent names from being obscured by not having enough space to display them.
 - Includes rollover boxes that highlight the current folder.
 - Files display their sizes and dates if there is enough room.
 - Added support for the Windows Property dialog box.
-

XYplorer

XYplorer is an Advanced File System Explorer for those looking for a real alternative to the Windows Explorer. Its features include: Tabbed Browsing, High end find files engine with excellent speed, Instant preview of image, Thumbnails of image files , Instant preview of installed and uninstalled font files, Instant preview of HTML, MHT, PHP files, Instant display of complete file and version information for each selected file, Various highlighting features add more visual grip to the folder tree, File Info Tips and MP3 Info Tips.

[Download](#) (634 kB)

Switch Off

Switch Off is a tiny easy-to-use system tray utility that automatically performs often used tasks such as shutdown or restarting the computer, disconnecting the current dialup connection, locking the workstation, etc. This tool has a customizable and intuitive Web interface, permitting you to start the tasks remotely from any computer with a web browser installed. Its interface includes WAP support, so you

can control your computer using a mobile phone. This utility is both the beginner and the advanced user.

7) Question of the Month about Software Training:

Each month Scott Turton will answer a current or important question that we have received about computer and software training.

June 2007 Question of the Month:

What happened to the design EducationOnlineForComputers.com?

Answer:

We have redesigned our website, EducationOnlineForComputers.com, giving it a new logo and a fresh, new look. We are posting new free training content and tutorial resources on the site as fast as possible, and we are fixing broken links as fast as possible also. I hope you like it the new look of the site and that its easier to use.

Scott Turton
Site Editor

Free Computer Software Training Now!

A free and member-based software educational and training portal web site. We have compiled, categorized, described, and linked many sites that will be of keen interest to computer software application end-users seeking free training and knowledge. Many subject areas are covered, including Microsoft Office, Flash, Photoshop, Dreamweaver, FrontPage, Web Development, Windows, Linux, and Computer Hardware. You are able to study and learn all about computer software via Free training, courses, tutorials, documentation, articles, tips, notes, and help. Check us out today.

Copyright Notice: Please note that all of the items hyperlinked are copyrighted by their authors and/or publishers. You are eXPected to look for, read, and adhere to such notices. Downloaded and online material is copyrighted whether or not a copyright notice is present.

*****[EducationOnlineForComputers.com's Member Site](#)*****

Our Members' Site contains the web's best computer software training resources and tutorials. This content is individually linked and presented in a way to eXPedite and facilitate your software and computer learning eXPerience. We have done all the web research and presentation work for you so you can concentrate solely on your computer training.

EducationOnlineForComputers.com Member Site FAQ Answers:

1. All of the web sites and pages in our members site are not in the free section of our web site. The member site training is more detailed and the best available. The online training resources in our members' site are linked and laid out in a much more detailed fashion than those in the free section. This will save you time in finding all the best free training on the web.
2. You can choose to pay using either Paypal or 2Checkout. If paying pay check and you live in the U.S., please select 2Checkout.

3. You have a choice to select the non-recurring or recurring method of payment. If you select non-recurring, when your membership period eXPires, you will not be automatically charged another fee on your credit card or check.
4. The total price to join our member's site is only \$14 total for 2 months, \$24 for 4 months, \$32 for 6 months, or \$56 for a whole year. The funds generated will assist us to help all those seeking software application education training. Here's the link to see what's available on our member's site and to sign up: <http://tinyurl.com/7ien> You can email Scott Turton with questions at scott_turton@educationonlineforcomputers.com

I will give you 5 Great Free Bonuses when you sign up now.

These are as follows:

1. **28 Modules of Soft Skills Training, covering topics such as Coaching, Delegating, Finance Essentials, Hiring, Leading and Motivating Team, Making a Presentation, Managing Your Time, and Setting Goals.**
2. **19 Online Business and Reference Books, including titles such as Scientific Advertising, The Art of Electronic Publishing, and Small Business Manual**
3. **12 Instructive e-Books, including On Line Stealth Marketing, 7 Secrets to Unlimited Traffic, and Increase Auction Profits.**
4. **Instant and Easy Online Access to the 24 Best Free Computer Help & Support Sites.**
5. **45 of the Best, Completely Free Programs and Utilities.**
