1) Editor's Greeting:

Hello everyone, and welcome to our new subscribers!

This is our fifth monthly Newsletter for our new site, EducationOnlineForComputers.com, giving you the most current Free online Software Training and Tutorial Resources that we have recently discovered and researched. This newsletter is free to anyone subscribing (instructions at bottom, no username/password is needed). To access our member site, however, you do need a user name and password - registering as a member of EducationOnlineForComputers.com costs only \$14 for two months, for more information please see below 'Become a Member of EducationOnlineForComputers.com'.

My desire is that these free resources will help you with your computer education and training and are tools to advance your career. Our main mission is the training of those less fortunate who are seeking to become computer literate, from a user's perspective.

By means of this email newsletter, you have knowledge of and access to these sites before our web site visitors do. The best of these resources will be added to our Member Training pages and the remainder to our Free Training pages.

*** Current Issue ***

This issue describes a total of 30 Software and Computer training, learning and tutorial web sites, with a total of 131 tutorial courses linked. It features many free Microsoft Office

training tutorials for your learning profit and enjoyment.

For your convenience, this newsletter is also available to subscribers in HTML format at this special url: http://www.educationonlineforcomputers.com/current_news.html

If you are looking for free technical or programming training, please visit our sister site: <http://www.intelligentedu.com>.

I wish you the best with your computer studies and learning.

6) Software, Office and Computer Sites and Downloads Worth Mentioning

Advanced Excel Find:

<http://www.office-addins.com/files/advanced-excel-find.exe>

This is an add-in that makes search through multiple worksheets and workbooks in Excel fast easy and comfortable. It allows you to simultaneously search in values, formulas and comments and more. Once all items are found you can move freely around search results. The Advanced Excel Find is an add-in designed for MS Excel 2000 and MS Excel XP and adds no new workbooks or VBA macros.

Advanced Office 2000 Password Recovery:

http://www.elcomsoft.com/AO2000PR/ao20pr_s.zip

A program to recover lost or forgotten passwords to files/documents created in Microsoft Office applications: Word, Excel, Access (share-level), Money, IE. Most passwords are being recovered instantly; the password to open in Word/Excel 97/2000/XP can be recovered using brute-force and dictionary attacks, optimized for speed (about 5 million passwords per minute on PII).

sqlDesktop:

<http://www.raggedclaws.com/freetools/...id=368>

Feeling overwhelmed by the constant stream of messages, documents, and data?

sqlDesktop might be just what you need to get back in control - this is a computerized manual filing system arranged just like an ordinary office with pictures of real cabinets and real folders. Inside these cabinets and folders, you can group together documents related to the same topic regardless of their physical storage location or data format. It's easy to use because you don't have to remember the exact name of the document or where you put it. This is free for individual desktops.

7) Question of the Month about Software Training:

Each month Scott Turton will answer a current or important question that we have received about computer and software training.

July 2003 Question:

Can you show me where I can obtain free Microsoft FrontPage Add-ins so I can increase the functionality and usability of FrontPage?

Answer:

Yes, here is the best site for links to all types of free add-ins, plug-ins, etc. for FrontPage:

FrontPage Resource Centre:

<http://www.accessfp.net/freefrontpageaddins.htm>

Here are four of the better FrontPage add-ins from Microsoft:

PageWeight Add-in for FrontPage:

<http://www.microsoft.com/...releaseid=31854>

When using the PageWeight add-in, you have one-click access to the main factors that contribute to the size of an HTML page. When the PageWeight window is displayed, you will see: size of page in KB, total number of characters, total number of font tags, total number of scripts, total size of all images and a breakdown of each image and how large it is.

Document Manager for FrontPage:

<http://www.microsoft.com/...a=42>

This add-in allows users to open/save and close multiple documents. Quickly select a document from the list of open documents. Additionally, users can see files by filenames or by Title.

Document Selector for FrontPage:

<http://www.microsoft.com/...a=43>

This add-in allows users to quickly select a document from the list of open documents. Additionally, users can see files by filenames or by Title.

AutoFormat:

<http://www.microsoft.com/...a=2>

Tables are commonly used on Web pages to organize and present information in rows and columns, in much the same way tables are used in print documents. Table AutoFormat provides the users an easy way to give their tables a professional look to display information on the Web, without having to know how to work with HTML tags.

I hope this helps you.
